

Introducing Archbright ReClaim

Get rewarded for your commitment to safety

Archbright ReClaim is a one-of-a-kind program to help companies improve claims management and safety practices, lower their workers' compensation premiums, and add to their bottom line.

Each year, the best performing **Archbright ReClaim** participants receive a full or partial refund of Archbright's service fee as a reward for workplace safety.

Similar to the Department of Labor & Industries' (L&I) retrospective rating program that pools the group's workers' compensation premium and distributes refunds of unused premium back out to the group, **Archbright ReClaim** pools the service fees participating organizations pay to Archbright. Archbright then takes 30% of that service fee each year and distributes refunds to the best performing companies enrolled in the program.

The Better the Performance, the Higher the Return

It starts with effective claims management. As a member of **Archbright ReClaim**, we manage all of your workers' compensation claims as if they are our own, regardless of severity, from beginning to end. Your dedicated claims team:

- Responds within 24 hours of claim notification to minimize costs and expedite claims management intervention
- Evaluates all claims, looking for patterns and cost containment strategies that may have gone unnoticed
- Receives and prioritizes all correspondence from the Department of Labor & Industries (L&I) to drive claims forward and keep you advised on their status
- Administers the Department of Labor & Industries' (L&I) Stay-At-Work reimbursement program so participants receive additional dollars from L&I
- A Written Program Review that includes your safety manual, and documented policies and procedures to ensure you are up to date with the latest regulations
- An Ergonomic Assessment to determine where workplace conditions and job demands are out of alignment in everyday work practices
- As needed Onsite Spot Noise Level Testing to take measurements at various locations in your facility and help determine whether an 8 hour time weighted average test is necessary.
- Accident Investigations and Incident Reports that may include questioning witnesses, inspecting the incident scene, and taking pictures of any property damage
- Access to Safety Training programs, with preparation assistance so you can train your managers and your employees
- Periodic participation in Safety Committee Meetings to help unite workers and management in their commitment to workplace safety

Archbright ReClaim also includes a dedicated Loss Control Analyst and support from the Archbright Safety Team through the following services:

- Access to the Archbright Safety Hotline for unlimited safety questions during any business day from 8 am to 5 pm
- A recurring Financial Review to uncover your true workers' comp costs and analyze your claims losses to determine where improvement is needed
- Periodic Inspections of your work areas to determine if there are any safety risks, including broken equipment, damaged equipment, and slip-and-fall hazards

Improving safety performance will not only save you thousands of dollars in workers' compensation insurance costs over time, it could also earn you an Archbright refund on your service fee each year.

Best of all, any company can qualify for our program regardless of industry, premium size, or past performance.

Let us reward you for your commitment to safety.
